

Understanding Autism: Key Facts Everyone Should Know

IMPRINT

Prevalence of Autism

- Autism spectrum disorder (ASD) affects 1 in 36 children.
- Boys are nearly 5 times more likely than girls to be diagnosed.

Early Identification Matters

- ASD often presents challenges before the age of 3 and lasts throughout a person's lifetime.
- Early diagnosis and intervention can significantly improve outcomes for children.

Autism Does Not Discriminate

ASD affects individuals across all nationalities, races, religions, and genders. It does not differentiate or target one group.

Communication Challenges

Many individuals with ASD face difficulties with communication. This can include:

- Challenges in spoken language.
- Struggles with social interaction.

Employment and Neurodiversity

- 35% of adults with autism have not had a job or pursued higher education after high school.
- Companies embracing neurodiversity gain advantages in innovation and culture

Autism and Co-occurring Conditions

Over 70% of individuals with autism have at least one co-occurring condition, such as ADHD, anxiety, or sensory processing disorders.

Unique Strengths

Individuals with autism often excel in:

- Attention to detail.
- Creative and artistic talents.
- Mathematical and technical skills.
